

Is this America that I`m living, raising a family, going to school, working and paying taxes in? When will the BS stop? I pay every month to listen to all the great channels like country, weather, traffic, comedy, news and hits that XM offers. I repeat, I PAY, so why would people try and stop my family and myself from enjoying a service that I pay for with my own money? Are they going to attack Compact disc makers next because they take away from FM? This isn`t America anymore, it`s a big b#tch fest and everybody has a problem with something. FM did itself in with all the garbage they play, endless talking and useless information. Being an Electronics Tech who offers a service to many people I need instant traffic and weather conditions to better plan travel routes to service these people, so I ask of you, ignore yet another pointless issue that has someones feathers ruffled.
